PROFESSIONAL SUMMARY

Techno-functional Product & Solution Delivery Leader with **13+ years** of experience driving **digital lending transformation** across **NBFCs, Small Finance Banks, and Fintech firms**. Proven expertise in shaping and delivering **LOS/LMS, digital onboarding/KYC, CRM, collections, and credit decisioning platforms** across diverse lending products.

Combines strong **business analysis, product ownership, solution design, and technology delivery** capabilities, translating **complex business requirements** into **scalable digital solutions**. Experienced in leading **Agile delivery, stakeholder alignment, vendor coordination, integrations, UAT, and production rollouts** across cross-functional teams.

Deep **domain expertise** across **microfinance, two-wheeler, home loan, LAP, MSME, and secured lending**, with hands-on fluency in **SQL, data models, APIs, system integrations, and reporting**. Recognized for **bridging business and technology teams** to convert ambiguous requirements into practical, production-ready solutions.

CAREER OBJECTIVE

To pursue a leadership role as an **Application Head / Application Owner/Product Owner**- Owning the digital lending application estate (LOS/LMS, KYC, CRM, collections) end to end across strategy, solution architecture, delivery and lifecycle governance.

CORE COMPETENCIES

• Application Ownership & Governance	• Application Lifecycle Management	• Digital Lending Transformation
• Enterprise Application Strategy	• Solution Design & Architecture	• Product & Platform Modernization
• LOS/LMS Ecosystem Management	• API & Systems Integration	• Application Integration Architecture
• Business–Technology Alignment	• Digital Lending Journey Design	• Application Performance & Optimization
• Technology Vendor Management	• Data & Application Modernization	• IT Delivery & Transformation Leadership

CAREER PATH

PROFESSIONAL EXPERIENCE

Solution Delivery Lead | L&T Finance Limited | Nov 2023 – Present

- **Digital Lending Transformation:** Lead end-to-end solution delivery across two-wheeler, home loan, MSME, and secured lending journeys covering onboarding, KYC, credit assessment, and collections.
- **Partner Ecosystem:** Own the design and delivery of a unified partner onboarding platform integrated with PhonePe, Google Pay, CRED, and Snapdeal across multiple lending products.
- **Application Strategy:** Define process flows and solution architecture for new lending propositions including Top-up, Pre-Approved, and Securitized loan products.
- **Digital Onboarding:** Drive eKYC, Digi Locker eSign, Aadhaar verification, OCR-based assessment, Video KYC, Video PD, and CKYC capabilities to digitize lending journeys.
- **Credit & Risk Technology:** Deliver integrations for Bureau Analyzer, GST Report Analyzer, Banking Report Analyzer, Hunter, MNRL, PAN, LEI, and URC verification to strengthen credit and fraud controls.
- **Customer Engagement:** Lead Planet CDP integration with MoEngage to enable customer segmentation, targeted offers, and engagement-led lending initiatives.
- **Third-Party Integrations:** Manage technology integrations with Perfios, Hyperverge, Digio, Signzy, CarWale, and other ecosystem partners to enhance application capabilities.

Technical Product Manager | Fincare Small Finance Bank | Sep 2022 – Nov 2023

- **Product Requirements:** Owned end-to-end requirement management across microfinance, LAP, home loan, and two-wheeler lending, covering analysis, BRD/FSD, traceability, validation, and delivery.
- **Lending Platforms:** Defined and delivered LOS/LMS propositions for microfinance and two-wheeler lending, aligning product workflows with business and operational requirements.
- **Digital Collections:** Implemented a digitized collection platform integrated with UPI to expand repayment channels and modernize collection operations.
- **Application Modernization:** Managed legacy M-Care/M-Serve requirements during transition toward modernized lending platforms.
- **Process Enhancement:** Enhanced LAP and Home Loan LOS workflows to improve lending-process efficiency and application usability.
- **Product Design & Delivery:** Used Figma, Draw.io, Visio, Jira, and Zoho to translate requirements into process designs, functional specs, and delivery plans.

Senior Application Manager | IIFL Samasta Finance Limited | Nov 2018 – Sep 2022

- **Application Ownership:** Managed application delivery across CRM, LOS/LMS, data warehouse, MDM, reporting, and digital collections for a growing NBFC-MFI lending ecosystem.
- **LOS Transformation:** Implemented and customized GLOW LOS to support expanding microfinance operations and digitize field-based loan origination.
- **Customer Platforms:** Designed and executed a customer-facing application enabling centralized query resolution across multiple loan products.
- **Enterprise Integration:** Delivered PAN, Voter ID, banking, CRM, LOS, and LMS integrations to strengthen customer servicing and lending operations.
- **Data & Reporting:** Led Data Warehouse and MDM implementation while establishing an in-house SQL-based reporting environment for business reporting.
- **CRM Transformation:** Implemented Zoho CRM integrated with LOS and LMS platforms to create a connected customer and lending ecosystem.

- **Digital Collections:** Architected cashless disbursement and collection management capabilities, integrating digital collections with Airtel, Fino, and Fingpay.

Business Analyst | Ujjivan Small Finance Bank | Jul 2015 – Nov 2018

- **Lending Application Delivery:** Delivered LOS, LMS, and CRM implementations incorporated with core banking systems across microfinance operations.
- **Data Migration:** Led legacy-to-modern platform data migration using SQL Server, ensuring structured transition of critical lending and customer data.
- **Mobile LOS:** Implemented GLOW mobile LOS with eKYC, eSign, and PAN verification to digitize field-based microfinance loan sourcing.
- **CRM Integration:** Implemented CRM Next with integration across Core Banking, LMS, and LOS to strengthen customer and application management.
- **Master Data Management:** Architected and executed MDM capabilities to establish consistent customer data across connected applications.
- **Application Analysis:** Worked across SQL Server, BRNET, GLOW, and CRM Next to translate business requirements into functional application solutions.

Senior Technical Support Officer / Team Lead | Micro Finance Limited | Nov 2012 – Dec 2014

- **Technical Support Leadership:** Led technical support and reporting operations, managing application incidents, problem analysis, and production issue resolution.
- **Production Operations:** Coordinated cross-functional teams to investigate recurring application issues and drive timely resolution of business-critical incidents.
- **Reporting & Analysis:** Supported operational reporting and technical analysis to improve application stability and day-to-day lending operations.

KEY PROJECTS & PRODUCT PORTFOLIO

1] Digital Lending Partner Onboarding Platform — L&T Finance

Business Problem: Fragmented application intake across multiple lending partners and digital platforms.

Role: Owned solution delivery, architecture coordination, process design, and partner integration roadmap.

Solution: Developed a unified onboarding platform integrated with PhonePe, Google Pay, CRED, and Snapdeal for home loan, two-wheeler, and MSME applications.

Outcome: Established a consolidated, partner-agnostic onboarding capability supporting multiple lending products.

2] Digital KYC & Credit Assessment Stack — L&T Finance

Business Problem: Manual and paper-intensive KYC and income assessment processes affecting digital lending efficiency.

Role: Led solution design and delivery across digital KYC, document processing, income assessment, and verification integrations.

Solution: Implemented eKYC, Digi Locker eSign, Aadhaar OCR, Perfios, Video KYC/PD, CKYC, and digital verification capabilities.

Outcome: Enabled a more digitized and streamlined onboarding and credit-assessment journey with reduced manual intervention.

3] GLOW Mobile Loan Origination System — Ujjivan SFB & IIFL Samasta

Business Problem: Field-based microfinance lending required a mobile-first, compliant, and integrated origination workflow.

Role: Implemented and subsequently customized the GLOW platform across both organizations as lending operations scaled.

Solution: Deployed the Craft Silicon-built mobile LOS with eKYC, eSign, and PAN verification integrated into the sourcing journey.

Outcome: Digitized microfinance loan sourcing with integrated downstream connectivity to LMS and CRM platforms.

4] Digital Collections Ecosystem — IIFL Samasta & Fincare SFB

Business Problem: Traditional cash-heavy collection processes required broader digital repayment options and centralized collection management.

Role: Architected and executed collection management and digital payment integration capabilities.

Solution: incorporated collection workflows with Airtel, Fino, Fingpay, and UPI to enable multiple digital repayment channels.

Outcome: Expanded digital repayment capabilities while supporting existing field-based collection operations.
